#### **MEGTEC Acquires Web Guidance and Silicone Coater Product Lines from QuadTech**

**De Pere, Wis., U.S.A., November 8, 2006**—MEGTEC Systems Inc. announced today it has signed an Asset Purchase Agreement that results in MEGTEC's acquisition of the QuadTech® Web Guidance System and QuadTech® Silicone Coater product lines from QuadTech Inc., a subsidiary of Quad/Graphics.

The acquisition is a strategic move by MEGTEC Systems to further expand its current web handling product line. For QuadTech, the sale is in alignment with previously announced strategic initiatives to position the company to better serve its core businesses.

“The QuadTech products are an excellent fit with our current offerings in the web handling category,” said Philip Strand, vice president of MEGTEC Systems' U.S. Printing Products Group. “We'll build on the success of both MEGTEC and QuadTech with industry-leading product design, manufacturing and service. What's more, the transition of commercial and support activities will be seamless for our joint customers.”

“QuadTech and MEGTEC offer the printing industry a powerful team of resources aimed at improving the quality, cost and immediacy of printing,” said Karl Fritchen, QuadTech president. “There is a clear synergy in research and development between our two companies. We share a dedication to technology and to customer satisfaction, and we feel our customers will benefit greatly from the new association with MEGTEC Systems.”

MEGTEC Systems, a unit of Sequa Corporation, is the largest supplier of splicers, rewinders, dryers, oxidizers and related equipment to the web offset printing industry. More information can be found at the company Web site, [www.megtec.com](http://www.megtec.com).
