FOR IMMEDIATE RELEASE

Signature Graphics purchases MEGTEC vertical heatset web offset dryers to achieve flexibility and versatility

De Pere, Wis., U.S.A. – April 12, 2010 - MEGTEC Systems Inc. announces the purchase of two MEGTEC vertical dryers and chill stands by Signature Graphics of Portland, Oregon, adding heatset capabilities as part of an expansion to their existing Tensor press. The equipment installation is planned for May, 2010.

The project will fulfill multiple needs for Signature Graphics. Dan Dutton, Executive Vice President said, “We have certain existing customers who have enquired about heat-set options, and we have numerous prospective clients who require heatset options. This project will allow us to service these existing clients’ needs by expanding our available printing solutions.”

With the addition of a MEGTEC Coanda Plus dryer and chill stand package to their press, Signature Graphics will now have the flexibility to offer their customers a hybrid package with both heatset and coldset printing solutions, with capabilities for printing a wide range of product brochures, mailers, newspapers as well as commercial printing.

Asked why Signature Graphics chose MEGTEC as the supplier, Dutton commented, “Following our due diligence process, we concluded that the MEGTEC vertical dryers would be a perfect fit for our project. The equipment specs fit our needs in terms of drying capabilities, and our research on MEGTEC yielded a comfort level in terms of service and reliability that was unparalleled.”

One of the key elements was MEGTEC's ability to meet their tight project deadline. Phil Strand, Vice President of MEGTEC's Printing Products business in North America added, "MEGTEC's engineering team worked to design a cost-effective solution by incorporating a Coanda vertical dryer for Signature Graphics application. We are proud to work with customers like Signature Graphics and provide a customized solution for their needs."

The MEGTEC Vertical Coanda dryer is a flotation dryer specifically built for vertical placement where space is limited, while retaining the quality and reliability of a horizontal MEGTEC dryer. The complete MEGTEC installation package for Signature Graphics includes the dryer and chill stand, driveline components, shafts and guards as well as provisions for two (2) cold webs to bypass the dryer. The package also arrives on site prewired and prepiped, helping to control costs by reducing the installation time required.

About Signature Graphics

A full-service commercial print facility open since 1984, Signature Graphics is one of the largest printers in the Pacific Northwest, located in Portland, Oregon. Signature Graphics provides a wide variety of print capabilities, with projects ranging from coupon books to high volume newspapers, catalogs, inserts and direct mail postcards.
