

# Lenze Acceleration

For DME\*, DME-S and DGV Pastors

Upgrade Bulletin

MEGTEC scope of supply

- ➔ AC Drive
- ➔ AC Filters for drive application
- ➔ AC Drive application module
- ➔ 3 Phases breaker
- ➔ Test mode enclosure
- ➔ New mechanical coupling between belt and motor to replace particle clutch
- ➔ All wiring & piping necessary for installation
- ➔ Software upgrade

Lenze Drive upgrade:

- ➔ Reliable, more robust system  
Eliminate the particle clutch, which reduces maintenance and the need for clutch replacement
- ➔ Ramp-up acceleration based on press speed, reducing the need for belt acceleration pressure adjustments for different roll weights
- ➔ Split coupling allows acceleration belt to be changed in a much shorter time
- ➔ Design provides more torque for heavier rolls than original design
- ➔ Includes test mode

\*Only available on systems upgrade with PLC. (SAIA PLC)

**\*In order to help us offer you the correct upgrade kit for your machine, please supply the following information: Machine type • Serial number • Manufacturing year**
