

# HX Infeed Upgrade

Pre-assembled control panel

HMI

## New features with upgrade:

- ➔ All of the upgrade replacement components are “off the shelf” parts
- ➔ The upgrade cost is a fraction of the cost of a new infeed
- ➔ Installation and start-up in less than 2 days per pass
- ➔ Upgraded dancer feedback
- ➔ All functions available on the local and remote HMI

## Why Upgrade:

- ➔ The existing DC motor is obsolete, requires maintenance and is expensive
- ➔ The existing DC drive is obsolete
- ➔ The tension load cells are not robust and are expensive to replace

## The upgrade consists of:

- ➔ Standard AC drive and motor
- ➔ Two 2-line displays, local and remote
- ➔ Pre-assembled panel that fits on existing standoffs

\*Note: This upgrade does not replace the harmonic drive or drive shaft, it replaces the existing obsolete drive and motor.

**\*In order to help us offer you the correct upgrade kit for your machine, please supply the following information: Machine type • Serial number • Manufacturing year**
