

PLC Upgrade Kit -Enkel BAT

for Models: 240/260/266

Upgrade Bulletin

Enkel has long provided Omron C200 series CPUs as the controllers for their products. This family of processors is now obsolete. MEGTEC Systems has developed an upgrade to replace your existing components with currently available technology.

New features with upgrade:

- ➔ Current C200 series PLCs are obsolete
- ➔ New PLC retains identical operation
- ➔ No operator training required

The upgrade kit comprises:

- ➔ Omron PLC
- ➔ Omron power supply
- ➔ Omron backplane
- ➔ Revised schematics
- ➔ Installation instruction
- ➔ PLC program

***In order to help us offer you the correct upgrade kit for your machine, please supply the following information: Machine type • Serial number • Manufacturing year**

For further information, availability, please contact your nearest MEGTEC office by visiting www.megtec.com and click on parts and upgrades or email to info@megtec.com.
