

Siemens Pressure Transmitter Upgrade

-replaces existing Ashcroft transmitter
(Service Kit # 310805)

This upgrade is designed as a replacement for Ashcroft pressure transmitters installed on oxidizers.

Siemens transmitter with local programming control pad.

New features with upgrade:

- ➔ Digital display showing actual pressure
- ➔ Can be installed in an outdoor application without the need to be in an enclosure
- ➔ Is easily programmed through a local control pad and has H.A.R.T. smart communications built in
- ➔ Can be configured for any pressure range up to 100 inches of water
- ➔ Two wire transmitter
- ➔ Parameters can also be locked with a password

The upgrade consists of:

- ➔ Mounting bracket
- ➔ Schematics for retrofit
- ➔ Shielded cable
- ➔ SST flex hoses
- ➔ Required piping connectors
- ➔ MEGTEC specific quick programming guide.
- ➔ Siemens transmitter
- ➔ Mounting bracket
