

Chill Stand Drive Upgrades

Replaces the old-technology Fairchild differential draw and harmonic transmissions with new, state-of-the-art bolt-on harmonic drives for older MEGTEC Thermal Chill Stands.

New features with upgrade:

- ➔ Higher precision for improved tension control and reduced paper waste
- ➔ Reduces maintenance costs
- ➔ Better cut-off control
- ➔ Finer advance/retard control
- ➔ Potential speed increases (in conjunction with press upgrades)
- ➔ Elimination of old-technology drive systems, many of which are very expensive and in some cases unavailable.
- ➔ Fewer internal moving parts
- ➔ Purely mechanical drive system (synchronous belt drives to mechanical variators)
- ➔ Re-use of existing Dynapar or Veeder-Root displays (reprogrammed for new drive ratios)
- ➔ MEGTEC supports current technology with 24/7 parts and service with over \$1M in spare parts on our shelves

***In order to help us offer you the correct upgrade kit for your machine, please supply the following information: Machine type • Serial number • Manufacturing year**

For further information, availability, please contact your nearest MEGTEC office by visiting www.megtec.com and click on parts and upgrades or email to info@megtec.com.
