

PLC Remote I/O Upgrade

for DDIII, DDTNV and DDRTO

The Siemens ET200 LSC remote I/O system is obsolete. MEGTEC suggests replacing this system with the newer ET200S remote I/O system.

New features with upgrade:

- ➔ Improved diagnostics
- ➔ Better availability
- ➔ Increased flexibility

The upgrade kit comprises:

- ➔ Base I/O assembly
- ➔ Remote I/O block
- ➔ Additional analog I/O if required

Note: Software upgrade required (included)

***In order to help us offer you the correct upgrade kit for your machine, please supply the following information: Machine type • Serial number • Manufacturing year**

For further information, availability, please contact your nearest MEGTEC office by visiting www.megtec.com and click on parts and upgrades or email to info@megtec.com.
