

# Modular retrofit of old DME "Type DM"

**Splicing box = Module 1**

The SAIA PLC replaces the old electronic box and manages the automatic splice sequence. It's connected to a display to configure and input dates. Displays information with the remaining time before the splice or about remaining copies available.

**Acceleration = Module 2**

This replaces the old clutch and acceleration board with Lenze drive package.

**Brake regulation = Module 3**

**Option description**

	Module 1 CHCA-DME	Module 2 YDL08055	Module 3 YDM08060
Option 1			
Option 2			
Option 3
